Chief Complaint: [blank]
History: Upon arrival found this ~40 yo F, Japanese national - lying on back in boat (dockside). Positive pressure respirator? ventilations by DIVE staff who states she pulled from water unresponsive while ascending from ~15 ft. of seawater while 'snuba' type diving. Staff - pt was last seen assisted to surface. 2 reason - when once breaking surface of H₂O became unresponsive - not breathing - blood coming from nose/mouth - pt in CPR + vent. by staff pt awoke - remained unresponsive to verbal/ motor commands - upon arrival pt noted cyanosis to face/neck/lips & extremities - hypoxic - combative type and gag reflex. CPT placed - prepared for O₂ intubation. Reg. @ 3mm. 1st, wet, cyanotic. Chest/Lung Sounds: diminished. C-rostis: visible trauma. Initially prepped for intubation. Case changed to R Lobe = rise + fall ETT
